Rome University Roma Tre is pleased to host QFW2018, the XIX Workshop on Quantitative Finance. QFW2018 is an annual conference directed to academia and industry exposing both theoretical and practical aspects of Quantitative Finance. The aim of the Workshop is to promote the interaction of relevant ideas among researchers and practitioners by covering topics in Mathematical Finance, Quantitative Risk Management, Portfolio Optimization, Financial Economics, Computational Finance, Econophysics, Financial Econometrics, Statistics of Financial Markets, Corporate Finance, and related fields. The two and a half days event particularly encourages the participation of Italian and foreign PhD students and young researchers, coming likewise from industry or academia. In order to maximize participation, no registration fee is required. Coffee-breaks, lunches and the social dinner will be offered by sponsors, and foreign PhD students’ accommodation expenses will be covered by scholarships. Following a well-established tradition, an official discussant to foster debate and receive additional feedback will be assigned to each presentation.
